EDUCATION

San Francisco State University

San Francisco, CA

B.S. in Molecular Cell Biology, Minor in Computing Applications and Chemistry

Aug 2024 – May 2027

- **GPA:** 3.90
- **Relevant Coursework:** Protein Modeling & Deep Learning, Organic Chemistry I & II & Lab, Machine Learning for Data Science, Calculus I, Data Science for Personalized Medicine, Data Structures for Data Science, Genetics, Microbiology, Molecular Cell Biology
- **Ongoing Coursework:** Biochemistry I, Molecular Genetics, Evolution
- **Certificates:**
 - Certificate in Data Science and Machine Learning for Biotechnology (Selective Cohort)
 - NSF AI Education Program - Machine Learning & AI Applications Bootcamp (Selective Cohort)
- **Awards:** NIH U-RISE Scholar, Genentech-PINC Scholar, Dean's List, Ridge Vineyards Academic Award

EXPERIENCE & LEADERSHIP

NIH U-RISE | Swei Lab

San Francisco, CA

Undergraduate Researcher

November 2025 – Present

- Conducting field sampling of predators, ticks, and environmental variables to support disease-risk modeling.
- Analyzing ecological and epidemiological datasets using Python to investigate factors influencing Lyme disease transmission risk.
- Trained in molecular and field techniques including PCR, gel electrophoresis, and biological sample processing for disease detection and analysis.

GEN-PINC

San Francisco, CA

Fellowship

August 2024 – May 2026

- Completed interdisciplinary training in machine learning, deep learning, protein modeling, and biotechnology through the GEN-PINC fellowship.
- Explored transformer-based protein language models, including ESM and inverse folding methods for biological sequence and structure analysis.
- Applied bioinformatics techniques including sequence analysis and gene-finding workflows using FASTA datasets.
- Participated in professional development coursework, industry engagement, and career preparation activities focused on biotechnology and computational biology.

WonderWorks Lab

Burlingame, CA

Lead Instructor

January 2026– Present

- Lead STEM-based workshops and hands-on learning experiences for students, integrating arts, science, and engineering.
- Facilitated STEM outreach programming at Genentech's Bring Your Child to Work Day (BYCTWD), leading hands-on science and engineering activities.
- Collaborated with the WonderWorks Lab team to adapt project-based learning activities for community events and classroom settings.
- Assisted with curriculum development, material preparation, and interactive demonstrations to create engaging learning environments.

Kings Swim Academy

San Mateo, CA

Swim Teacher | Deck Supervisor

May 2022 - November 2025

- Monitored and adjusted pool chemical levels, ensuring proper pH balance and chlorine concentration.
- Taught swimming and water safety to people of all ages, improving physical health and injury prevention.
- Developed customized lesson plans and hosted monthly parent meetings regarding their child's progress.

PROJECTS

Protein Language Models & ESM Inverse Folding

- Explored transformer-based protein language models and Meta's ESM Inverse Folding model to investigate protein sequence generation, structure-sequence relationships, and computational protein modeling.

NutriAi

- SF Hacks 2025: Utilized the Google Gemini API to develop an AI-powered tool that assists users in making healthier food choices through nutritional analysis and personalized recommendations.

Personal Website

- Designed and developed a personal academic website to showcase research experience, technical skills, and computational biology interests. Deployed publicly using GitHub Pages.

RELEVANT SKILLS

- Programming & Data Science: Python, Machine Learning, Deep Learning, Data Analysis
- Computational Biology: Protein Language Models, Protein Modeling, Bioinformatics, Sequence Analysis
- Laboratory Techniques: PCR, Gel Electrophoresis, Biological Sample Processing
- Professional: Teaching, Communication, Chinese (Proficient), Red Cross First Aid/CPR/AED Certified
